

Absolutely. Let's do **School Personnel first**, and we'll go link-by-link from the dashboard.

Based on your DFD/ERD, I would make the personnel dashboard roughly:

One important correction: I wouldn't necessarily call the links exactly "Audit Data" or "Reports" yet. We should use the DFD's terminology where possible.

Let's go through each one.

1. Teachers — Teacher Data

This corresponds to the DFD's "**Teacher Data**" and the teacher-related entities in your ERD.

When the school personnel clicks **Teachers**:

Teachers		[+ Add Teacher]		
School: ABC Elementary School		SY: 2026-2027		
🔍 Search teacher...		Position: [All ▼]		
ID	Teacher Name	Position	Subject	Status
T001	Juan Dela Cruz	Teacher I	Math	✓
T002	Maria Santos	Teacher II	English	✓
T003	Pedro Reyes	Teacher I	Science	✓
1-3 of 32 teachers				

Clicking a teacher:

Teacher Profile		
Teacher ID:	T001	
Name:	Juan Dela Cruz	
Position:	Teacher I	
Subject:	Mathematics	
School:	ABC Elementary	
Class Assignment		
Class	Subject	Students
Grade 7-A	Mathematics	35
Grade 8-B	Mathematics	32
[Edit] [Back]		

Why this screen exists

The ERD shows teacher information connected to:

- teacher details

- teacher position
- subjects
- class staffing
- enrollment/program relationships

So this isn't simply a "list of 32 teachers." It's where the detailed teacher information is maintained.

2. 📁 Enrollment — Enrollment & Programs

This corresponds directly to **Process 1.0: Enrollment and Teacher Data**.

Enrollment Data		[+ Add Record]
School: ABC Elementary School School Year: 2026-2027		
TOTAL ENROLLEES		
850 Enrollees		
Enrollment by Grade		
Grade	Students	Status
Grade 7	180	✓
Grade 8	175	✓
Grade 9	165	✓
Grade 10	170	✓
Grade 11	80	✓
Grade 12	80	✓
[Edit Enrollment]		[Submit]

The **exact breakdown** should come from your actual ERD/business rules. I'm illustrating the UI flow here rather than saying these exact grade fields are required.

3. Audit Data

This is where I'd be careful.

Your DFD does **not** show the school personnel performing an independent "audit" process.

The personnel is mainly providing the data that the system will validate and that the SDO will monitor.

So instead of making a

Data Submission	
School Information ABC Elementary School	✓ Complete
Teacher Information 32 teacher records	✓ Complete
Enrollment Information 850 enrollees	✓ Complete
Class Staffing 32 teacher assignments	✓ Complete
READY FOR SUBMISSION	
[Submit for Review]	

This is a **very useful UI** because it matches the DFD's concept of:

```
Data
↓
Validate
↓
Save
↓
Generate reports
```

4. Audit Status

After submitting, the school personnel needs to know:

"What happened to my submission?"

So:

Audit / Submission Status
ABC Elementary School School Year: 2026-2027
✓ ✓ ● ○ Submitted → Validated → Under Review → Completed
Current Status ☐ UNDER REVIEW Your submitted information is currently being reviewed by the Division Monitoring Team. Last Updated: October 6, 2026

This is directly connected to your DFD's flow between:

School → System → SDO → System → School

5. Feedback

This is particularly important because your Level 0 DFD explicitly shows:

SDO → Teacher Audit Information System → School Personnel

So the school needs somewhere to see what the SDO sent back.

SDO Feedback
● Action Required School: ABC Elementary School Date: October 6, 2026

Finding Teacher/class staffing information requires verification. Recommendation Please review the teacher assignments and resubmit. [View Affected Records] [Correct & Resubmit]	
--	--

This is one of the clearest screens we can derive from the DFD.

6. Reports

This is where the personnel can see the information generated by **Process 3.0 — Generate Monitoring Reports**.

Monitoring Reports		
School: ABC Elementary SY: 2026-2027		
850 Enrollees	32 Teachers	26 Classes
Teacher Staffing Summary		
Position	Number	Status
Teacher I	18	✓
Teacher II	10	✓
Teacher III	4	✓
[View Detailed Report] [Export]		

The actual report fields should be based on what your ERD supports.

7. Account

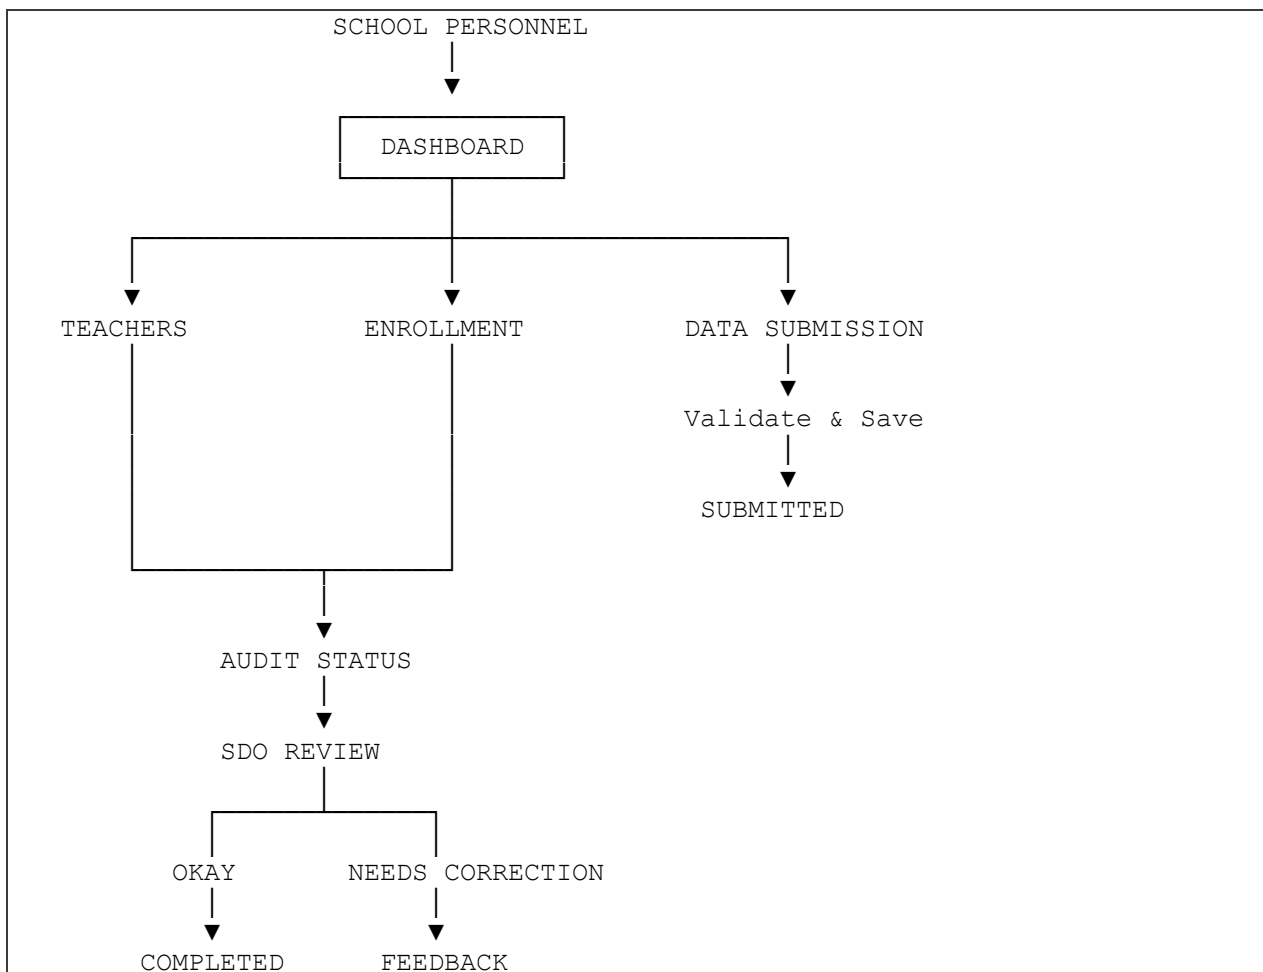

This isn't really shown in the DFD/ERD you gave me, so this is more of a **normal application requirement**, not something I would claim is required by your diagrams.

It could simply be:

My Account	
Name:	Juan Dela Cruz
Role:	School Personnel
School:	ABC Elementary School
Email:	personnel@school.edu
[Edit Profile]	
[Change Password]	
[Log Out]	

So your personnel navigation becomes

I'd structure it like this:

The important thing

For your actual UI design, **don't make every link equal in importance.**

I'd make the main personnel flow:

Dashboard → Teachers / Enrollment → Data Submission → Status → Feedback

while **Reports** is more of a viewing function.

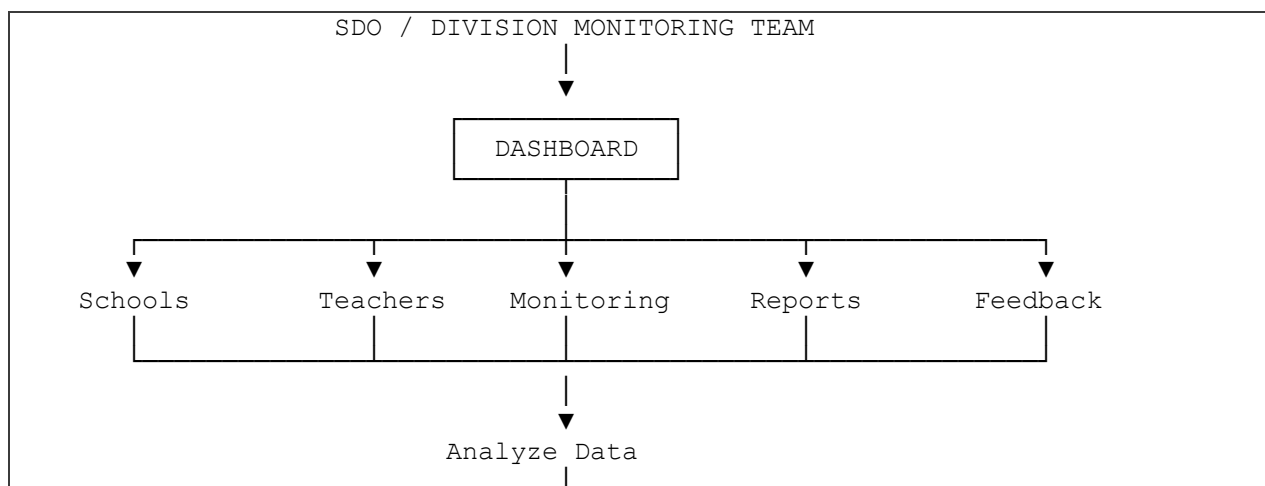

Next, we can take **Dashboard → Teachers** and go *one level deeper*, mapping the exact screens:

Teacher List → Add Teacher → Teacher Details → Edit Teacher → Class Assignment → Subject Assignment

using the tables in your ERD so you know exactly what fields/components to put in each UI.

Based on your DFD, the SDO's job is **not to enter the school's basic data**. The SDO primarily **views, monitors, analyzes, and gives feedback** based on the information submitted by schools.

So I would structure the SDO dashboard around this flow:

Give Feedback

Let's illustrate each link.

1. 🏠 SDO Dashboard

This should be the **overview of the entire division**, rather than one particular school.

TEACHER AUDIT INFORMATION SYSTEM		SDO / DMT	
 Dashboard  Schools  Teachers  Monitoring  Reports  Feedback  Account	Division Monitoring Dashboard		
	School Year: [2026-2027 ▼]		
	24	643	15,820
	Schools	Teachers	Enrollees
	Audit Status		Schools Needing Review
	✓ 18 Complete ● 4 Review ! 2 Action		⚠️ ABC Elementary ⚠️ XYZ Elementary

What the SDO learns here

At a glance:

- How many schools are being monitored
- How many teachers
- How many enrollees
- Which schools have completed submissions
- Which schools need attention
- Which schools have issues

This is the **starting point**, not where detailed auditing happens.

2. 🍏 Schools

This is probably one of the most important SDO screens.

The SDO needs to select a school to monitor.

Schools				
🔍 Search school...		District: [All ▼]		
School	Teachers	Enrollees	Status	
ABC Elementary	32	850	✓ Done	View
XYZ Elementary	25	620	⚠ Review	View
DEF Elementary	41	1,020	✓ Done	View
GHI High School	56	1,430	● Review	View

Click **View**:

ABC Elementary School		[← Back]
School Year: 2026-2027		
850 Enrollees	32 Teachers	26 Classes
School Information		
Teacher Data		
Enrollment Data		
Class Staffing		
Monitoring Reports		
[Review School]		

This becomes the SDO's **central school profile**.

3. Teachers

This is where the SDO can see teachers **across schools**.

Remember the distinction:

School Personnel

"My school's teachers."

SDO

"Teachers across the schools I'm monitoring."

So the SDO version could be:

Teacher Monitoring				
Search teacher...				
School: [All ▼]		Position: [All ▼]		Subject: [All ▼]
Teacher ID	Teacher	School	Position	Status
T001	Juan Dela Cruz	ABC Elem.	Teacher I	✓
T002	Maria Santos	ABC Elem.	Teacher II	✓
T003	Pedro Reyes	XYZ Elem.	Teacher I	⚠

The SDO can click a teacher to inspect their details.

4. Monitoring

This is probably the **core SDO function** based directly on your DFD's:

4.0 Monitor and Analyze Data

I'd make this more analytical than the normal school pages.

Monitoring

School: [All Schools ▼] SY: [2026-2027 ▼]

DIVISION OVERVIEW

Schools	Teachers	Enrollees
24	643	15,820

Staffing Monitoring

School	Teachers	Classes	Status
ABC Elementary	32	26	✓ Normal
XYZ Elementary	25	24	⚠ Review
DEF Elementary	41	30	✓ Normal

[View Details]
[Analyze]

Clicking **Analyze** could give:

School Analysis – XYZ Elementary

Teachers: 25
Enrollees: 620
Classes: 24

⚠ Potential Staffing Issue

Some class assignments require review.

Teacher / Class Assignment

Teacher	Class	Subject	Status
Teacher A	7-A	Math	✓
Teacher B	7-B	English	✓
Teacher C	8-A	Science	⚠ Review

[Give Feedback]

That connects directly to the DFD's:

Monitoring → Analyze Data → SDO

5. Reports

Your DFD specifically says:

3.0 Generate Monitoring Reports

So this deserves its own page.

Monitoring Reports			
Report Type: [Teacher Staffing ▼] School: [All Schools ▼] School Year: [2026-2027 ▼] [Generate Report]			
REPORT PREVIEW			
Division Teacher Monitoring Report			
Total Schools: 24 Total Teachers: 643 Total Enrollees: 15,820			
Schools Requiring Attention: 2			
School	Teachers	Enrollees	Status
ABC Elementary	32	850	Normal
XYZ Elementary	25	620	Review
[Export PDF] [Print]			

This is the output of **Process 3.0**.

6. Feedback

This is where the SDO **sends information back to the system**, which then goes back to the school.

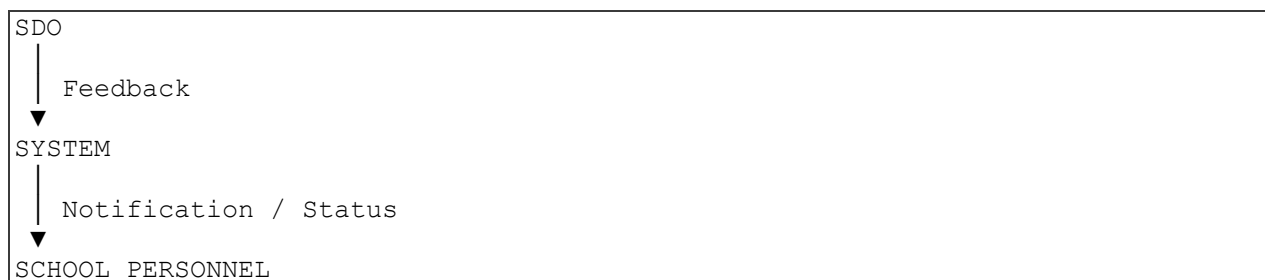

So this link is extremely important.

Feedback			
Pending Reviews			
School	Submitted	Issue	Action
ABC Elementary	Oct 5	Staffing	Review
XYZ Elementary	Oct 5	Data	Review

Click **Review**:

Review – ABC Elementary
Submitted Data Teachers: 32 Enrollees: 850 Classes: 26
Finding Teacher/class staffing needs verification.
Feedback to School Please review the teacher assignments for Grade 8. Verify the submitted information and resubmit.
Status: [Needs Correction ▼] [Send Feedback to School]

After clicking **Send Feedback**:

That's the back-and-forth relationship shown in your Level 0 DFD.

7. ⚙ Account

Same as the personnel side, this is a normal application function rather than something clearly specified by your DFD.

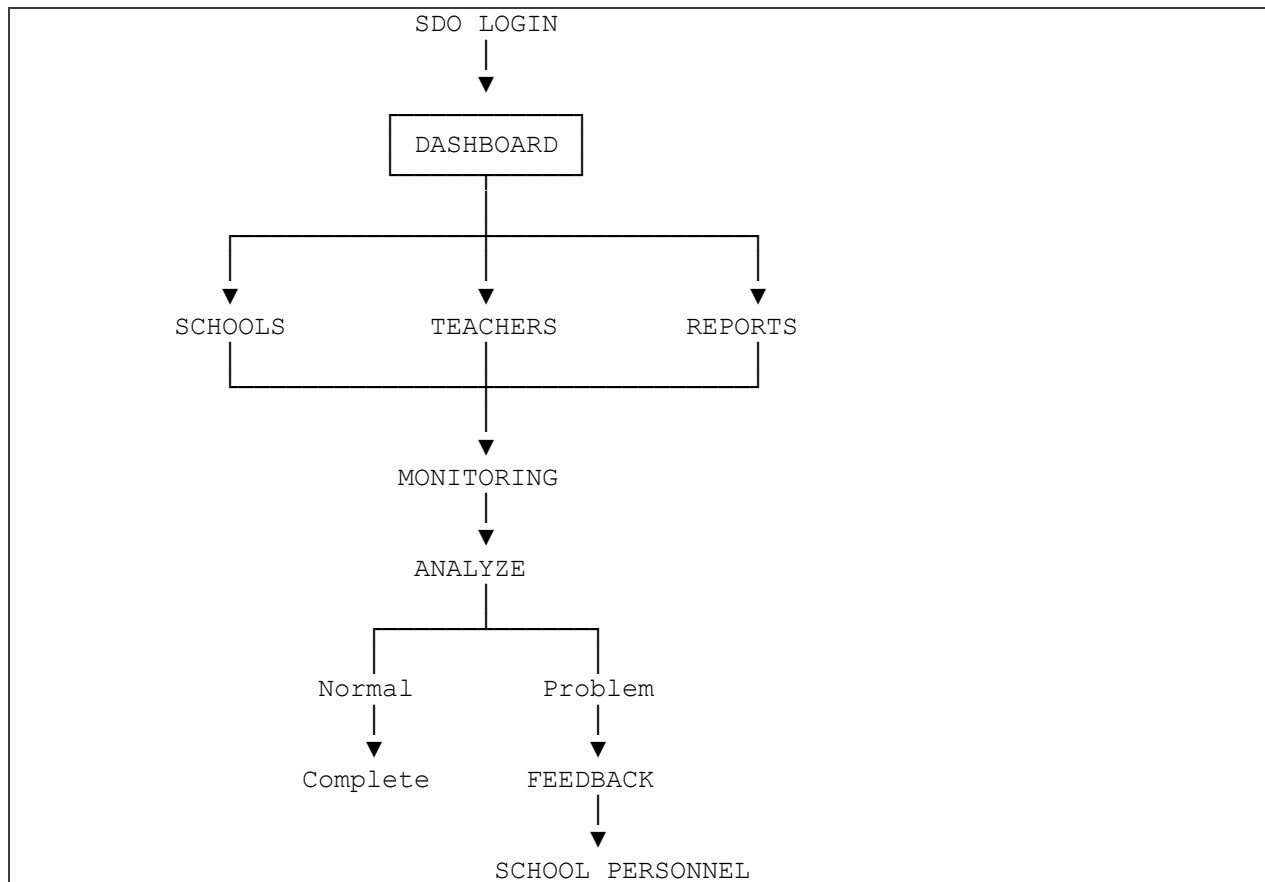

SDO Account	
Name:	Division Monitoring Team
Role:	SDO / DMT
Division:	[Your Division]
[Edit Profile]	
[Change Password]	
[Log Out]	

Putting the SDO UI together

Your SDO sidebar could therefore be:

TEACHER AUDIT SYSTEM	
🏠	Dashboard
🏫	Schools
👤	Teachers
📊	Monitoring
📄	Reports
💬	Feedback
⚙	Account
🚪	Logout

And the **actual SDO workflow** is:

The key distinction from the Personnel UI

Personnel is data-entry / correction oriented.

Enter → Validate → Submit → See Feedback → Correct

SDO is monitoring / analysis oriented.

View → Monitor → Analyze → Find Issue → Give Feedback

That distinction is probably the most important thing to preserve when you start designing the actual screens.
